

ES.0 Executive Summary

ES.0.0.1. This Analytical Data Report (ADR) presents a data summary for the physical and analytical data collected during field investigations within Operable Unit (OU) 11 located at Hill Air Force Base (HAFB or Base), Utah. Data presented in this ADR were collected between February 1, 2002 and December 31, 2002 as part of the on-going Remedial Investigation/Feasibility Study (RI/FS) for OU 11.

ES.0.0.2. During 2002, OUs 9, 10, and 11 were reorganized and realigned under OUs that have similar groundwater contaminants and likely remedies. The Golf Course Area was transferred from OU 11 to OU 9. During 2002, the 800/900 Area was added to OU 11 and was subsequently transferred to OU 9 during the realignment of OUs. Presently, OU 11 consists solely of the 454 Area.

ES.0.0.3. Field activities that have been conducted at OU 11 during the RI/FS process include: cone penetration testing (CPT) and direct-push groundwater sampling, monitoring well installation and sampling, soil sampling, and water level measurements.

ES.0.0.4. The field and analytical results associated with the CPT program, shallow groundwater sampling, monitoring well sampling, soil sampling, and water level measurements are documented in this ADR. Field investigation activities performed and data collected subsequent to this report will be documented in the OU 11 RI/FS report. Field activities performed and data collected prior to this ADR are documented in the *Analytical Data Report for Operable Unit 11, May 1, 2001 through January 31, 2002* (CH2MHILL, 2002).
